

USS specialises in the carriage and logistics solution to the worldwide Auto components and aftermarket industry.

The automotive industry is a just-in-time business. Deliveries increasingly take place directly to the assembly line during production. USS offers you professional logistics solutions for the entire automotive supply chain – in accordance with the highest safety and quality standards.

Our international Network connects manufacturers and suppliers to the global procurement, production and sales markets – regardless of whether in Europe, South America, Asia or Africa.

We deliver individual parts, for example, tires, airbags, seat belts, fittings or components for electronic connections within the agreed time to automobile industry manufacturing plants in India & Europe. We additionally take on for you the sequencing and delivery, just-in-sequence, to automobile industry assembly lines.

Are you looking for an on-site logistics partner? We would be happy to develop complete in-house solutions for you on-site in your plant. Working directly with us enables better supplier control, direct communication flow, lower wholesale freight multiple solutions and online Track n Trace.

We hope you find our auto components and aftermarket solutions interesting and encourage you to send us an inquiry.

With Best Regards, Met vriendelijke groeten, Sincères Salutations
