

## Energy, Mining + Projects Sector

The USS energy, mining and projects supply chain team combines the experience, expertise and long-standing relationships of our mining, energy, infrastructure, oil and gas, and industrial clients.

This vertical offers a complete end-to-end solution using innovative methods. With our experienced staff, we can combine services such as chartering, project freight forwarding, and specialized cargo shipping together with world-class project management to remove complexity from energy, mining and projects supply chains.

USS moves project freight to/from anywhere in the world by land, sea and air, using trucks, rail, cranes, ships, barges, and planes.

USS has a reputation for providing high-quality, configured logistics solutions for projects of any size. From planning, support, site surveys and cargo analysis to job-site delivery, our global network of experts gives you hands-on control of your shipments in the following highly specialized areas:

### Oil and gas

- Refineries, Valves and pipelines • On and off-shore drilling Supply.

### Power and energy

- Power stations equipment's logistics • Engines and turbines.

### Mining

- Heavy-equipment handling • Original equipment manufacturers.

### Infrastructure

- Airports • Dams/bridges • Harbours and ports • Pipelines

### Industrial

- Industrial factories • Cement • Pulp • Fertilizer • Breweries • FMCG

The Energy, Mining + Projects group is a specialist unit within USS that designs and implements tailor-made solutions that eliminate supply chain complexities and maximize competitive advantage.
